Professional Summary

Professional and detail-oriented Java Developer with strong knowledge of Java, Python, Object-Oriented Programming, backend development, REST API integration, database handling, and web technologies. Experienced in building automation-based applications, recruiter workflow systems, job search automation, dynamic resume generation, and professional email automation. Skilled in writing clean and maintainable code, debugging application issues, understanding business requirements, and developing practical software solutions. Strong understanding of software development lifecycle, backend logic, API communication, data handling, and workflow automation.

Applied Role

JAVA DEVELOPER - C2C

Technical Skills

- Java Programming
- Python Programming
- OOP Concepts
- Backend Development
- REST API Integration
- MySQL Basics
- HTML5
- CSS3
- JavaScript
- Git & GitHub
- Automation Workflow
- Debugging
- Problem Solving

Project Experience

API1 - LinkedIn Recruiter Automation Project

Developed an API1 LinkedIn Recruiter Automation Project that automatically searches LinkedIn job roles, filters Java Developer C2C opportunities, generates customized PDF resumes, and sends professional recruiter emails with resume attachments. The system reduces manual job application effort by combining LinkedIn search automation, recruiter email workflow, dynamic resume generation, and Gmail SMTP integration.
